

How to Create a Goal-Oriented Project Roadmap

Whether you live by the common saying, “The first step is always the hardest.” or Martin Luther King Jr.’s, “Faith is taking the first step even when you don’t see the whole staircase.” there is no denying that beginning a new initiative can be daunting. Don’t let that stop you from **pursuing the project of your dreams**. Read on to learn how to best develop a roadmap that’ll take your project to the next level.

Pre-construction

- 1 Identify your goal
- 2 Leverage tools and technology that can assist in mapping out your path
- 3 Recruit the most qualified team members

Agility is your friend.
Hope for the best but
prepare for the worst.

“The single
biggest problem in
communication is
the illusion that it
has taken place.”
— George Bernard Shaw

Active construction

- 1 Manage materials
- 2 Stay on top of metrics and analytics with a real-time tracking system
- 3 Coordinate with the General Contractor by centralizing your project support (PMO)

Tracking and monitoring specification adherence during this phase is key, especially with multiple subcontractors and even more staff members on-site from various disciplines working simultaneously.

Post-construction

- 1 Ensure work is compliant with regulations and standards
- 2 Review your work and implement feedback
 - What went well?
 - What could have gone better?
 - Did I meet my original goal?
 - How can I adjust to set myself up for success for the next project?
- 3 Celebrate a job well done and continue striving to deliver quality work

What’s Next?

Even the most well-prepared roadmap can’t promise an obstacle-free project. When roadblocks arise, you’ll want the best team on your side to guide you to success. That’s where we come in. Are you ready to take your project to the next level? Get in touch today.
